17 MAY 2008

Sub: Simplification of procedure for issue of consent for installation of new/additional DG Sets by existing industries -reg.

---0---

Issues relating to simplification of procedures in order to reduce paper work were discussed at length during the Regional Officers meeting held on 10-1-2008. Some of the decisions taken during the meeting have already been implemented. In line with the above, the following simplified procedure is prescribed for issuing consents for installation of new or additional DG Sets in existing industries with immediate effect until further orders.

ORDER

- If any industry/organization having valid consent installs/proposes to install a new or additional DG Set, during the currency of the consent then they may furnish the details of the DG Set through a letter for approval of Board. Based on that letter an addendum could be issued to the already valid consent.
- No fee be insisted if the capacity of the DG Set is less than 1000 KVA. Also before issuing addendum the Regional Officer concerned should examine whether the location of the DG Set is appropriate and whether necessary acoustic measures have been proposed/provided.
